

## **Seasonal Lab Technician - Materials Inspection and Testing**

### **Paterson Group Inc. – North Bay, ON**

Paterson Group, one of Canada's oldest geotechnical engineering consulting firms, is recognized for expertise in geotechnical engineering, environmental engineering, hydrogeology, materials testing, noise, and vibration studies, structural engineering and building science engineering. Customer service is our first priority. We provide professional services based on technological expertise, interactive project management, a wealth of local knowledge, and creative solutions.

Paterson Group's client base includes major developers, building owners, property management firms, condominium properties, and many other public and private housing and commercial building groups.

Paterson Group offers the opportunity of a rewarding career at a highly successful consulting firm. You will be part of an engaging team of engineers and technologists working on exciting and challenging projects in a culture of continuous learning and collaboration.

The North Bay Lab has an immediate opening for a Seasonal Materials Laboratory Technician.

#### **Duties and responsibilities for this position will include:**

- Predominantly test day to day samples for the private sector and/or government contracts.
- Laboratory Testing of aggregate, soils, asphalt and/or concrete;
- Field quality control of construction materials;
- Compile and tabulate technical data for use in technical reports.
- Conduct equipment calibration and maintenance.
- Materials sampling.
- Test equipment and conduct scheduled maintenance on tested equipment.
- Learn to effectively organize assigned daily tasks based on workflow and due dates.

#### **Job Requirements:**

The successful candidate will be relied upon to deliver materials inspection and testing services to various professional staff. A motivation to provide high quality customer service is essential to the role. In addition, the candidate should have the following qualifications and skills:

- 2 + years of experience in a similar role in construction
- Candidate must have a relevant college diploma and /or significant work experience related to materials laboratory testing.
- Preferably CCIL, ACI certified (for field concrete).
- CET Certification is also considered an asset.
- Knowledgeable and comfortable with standards codes such as ASTM, LS, CSA, OPSS etc...
- Must be able to read, understand and follow work instructions in a safe, accurate and timely manner.
- Proven ability to manage and coordinate multiple projects in a fast-paced, highly professional environment.
- Ability to work well with others and independently.
- Proven time management skills and a strong attention to detail.
- Excellent communication skills.
- Must possess a valid Ontario Driver's license and have access to a vehicle with valid registration and insurance.

**Start date:** ASAP (negotiable)

**Physical Requirements:**

Ability to occasionally lift and move items and equipment up to 50 lbs. The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job.

**How to apply:**

If you are passionate about engineering and eager to contribute to a company that values innovation and excellence, we encourage you to apply through Indeed. We appreciate the interest and efforts of all applicants; however, only those short-listed as candidates will be contacted.

*Paterson Group Inc welcomes and encourages applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.*
